

Essential Skills Series in Evaluation – Facilitated Online Session

10-week online session starting January 17 and ending April 2, 2022

THIS COURSE IS DESIGNED FOR THOSE WHO ARE NEW TO EVALUATION.

Register soon as we will be limiting group size to 20 to ensure maximum benefit to participants.

The Essential Skills Series was completely re-designed in 2014 by the Canadian Evaluation Society incorporating state-of-the-art thinking and modern adult learning principles.

Prior knowledge of evaluation, or of social science research methods, is not required, and this course is geared towards individuals who are new to evaluation. On completion, participants will be equipped to enter and participate in the evaluation field and to develop as evaluation professionals. Graduates will be able to describe in basic terms 28 core evaluation concepts – from the uses and benefits of evaluation through common data collection methods to evaluation ethics and standards – and will gain elementary experience in six core practices – from creating logic models to writing findings statements.

Participants will use the e-Institute online platform for course material, complemented by online group discussions and guest speakers addressing relevant topics.

CES-NCC has engaged bilingual facilitators for this series. Presentations, course materials and correspondence will be available in both English and French. Should the composition of the group allow, breakouts will be organized so that participants have the option of joining French or English groups.
